

AVULA JAYANDRA SAINADH

Hyderabad, Telangana, 500072

+91 9701569331 | jayandrasai123@gmail.com | [LinkedIn](#) | [Portfolio](#)

CAREER OBJECTIVE

Passionate, self-motivated, and enthusiastic Computer Science graduate with hands-on experience in engineering and analytical projects. I thrive on challenges, foster a collaborative team culture, and take the lead in developing data-driven solutions. With strong expertise in SQL, Python, and Power BI, I aim to innovate and drive data-based decision-making in the IT industry.

EDUCATION DETAILS

Sathyabama Institute of Science and Technology

Chennai, T.N.

Bachelor of Engineering in Computer science, | CGPA: 7.50/10,

Dec. 2021 - Dec. 2025

PROFESSIONAL EXPERIENCE

Freelance Data Annotator – Outlier (Remote)

Feb. 2024 - Feb. 2025

Remote

- Labeled, reviewed, and improved datasets to support AI/ML model training and evaluation.
- Analyzed and categorized data (text, images, and other content) to ensure quality, accuracy, and consistency.
- Provided feedback and corrections to enhance model performance and training efficiency.
- Strengthened understanding of data workflows, NLP basics, and real-world dataset management.

PROJECTS

Multi-objective Cloud Task Scheduling for Profit Optimization

Feb 2025 - Aug 2025

- Developed an AI-driven genetic algorithm framework for efficient task scheduling in cloud environments
- balancing provider profit and user cost through a multi-objective fitness function. Integrated priority-based scheduling and used Cloud Sim for simulation.
- Visualized performance metrics using Matplotlib, achieving improved profitability, reduced costs, and better scalability

Built an end-to-end SQL pipeline using CTEs and Window Functions

Jun 2026

- Built a SQL pipeline using CTEs and window functions to fix a 16% data duplication rate in messy e-commerce logs.
- Engineered CAC metrics that proved Google ads were 46% more cost-effective than Instagram, allowing leadership to confidently optimize 20% of the marketing budget.
- <https://github.com/Jay97015/sql-marketing-analytics/blob/main/README.md> .

OTT Data Cleaning

- Engineered an automated data-wrangling pipeline in Python to transform messy, real-world OTT logs into analysis-ready datasets.
- Fixed critical issues like corrupted timestamp arrays and structural duplicates, protecting downstream analytics dashboards from faulty business metrics.

TECHNICAL SKILLS

Programming languages: Python

Libraries: Pandas, NumPy

Databases: SQL

Data Tools: Power Bi, Excel, Jupyter Notebook

Soft Skills: Detail-oriented, Strong documentation, Time management, Communication, Problem-solving

CERTIFICATIONS

- Data analysis Training – Innomatics institute, Hyderabad.
- SQL and Python – Imarticus Learning: Hands-on exposure to database querying and data preprocessing.
- MATLAB for Data Processing and Visualization – MathWorks: Enhanced data visualization and analysis skills
